

# Embedded Technologies s.r.o.

The company develops software solutions for embedded systems since 1996. We offer our deep experience in network and industrial communication protocols, real time operating systems, client applications, database solutions, Java environment, Adobe Flash. Our knowhow covers also network diagnostics and training.

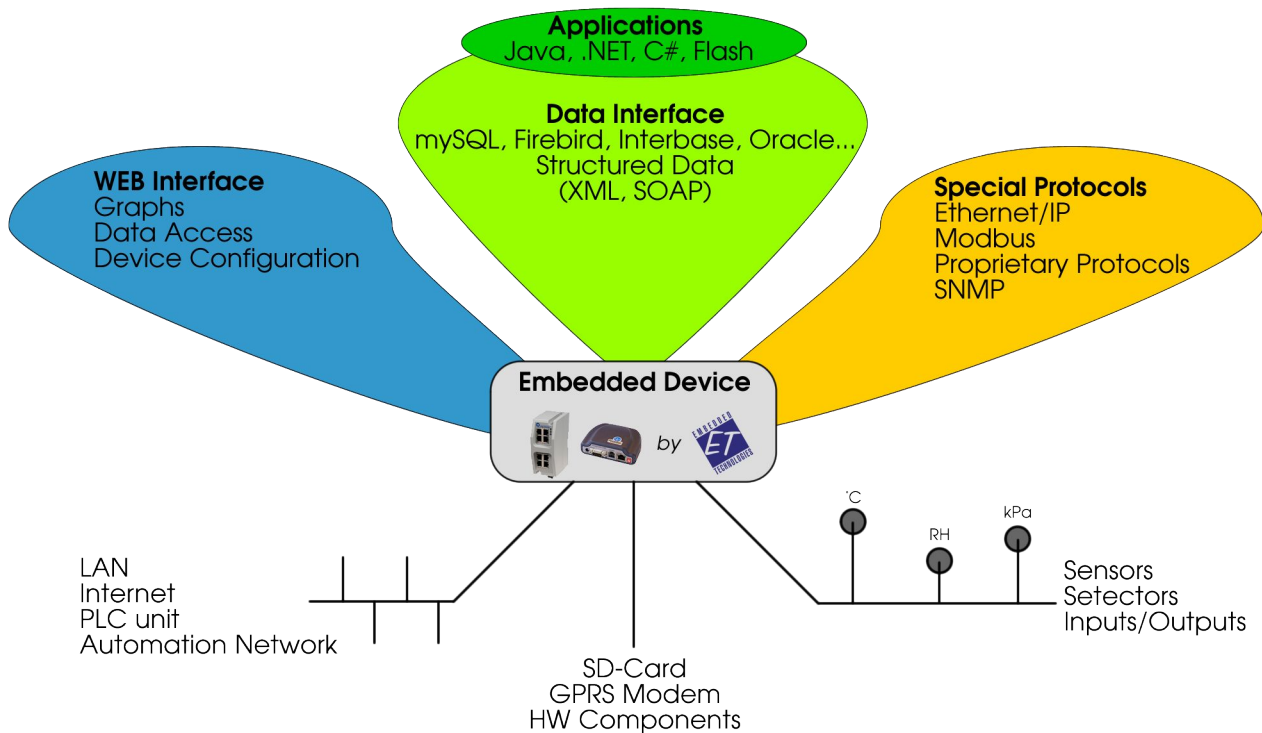

We are prepared to respond fast to customer requirements and to deliver running application and skilled support in a very short time.

## Specialization:

- Communication protocols: TCP/IP, SNMP, HTTP, FTP, SMTP, ACD, DHCP, BOOTP, RIP, IGMP, CIP, Modbus, XML, SOAP.
- Deep experience with Ethernet/IP (CIP) thanks to development for Rockwell Automation.
- Platforms: Freescale Coldfire, S08, 68HC, PIC, Atmel AVR, x51, ARM7.
- Programming languages: C, C++, C#, Java, .NET, assembler of Intel, Freescale and AVR uPs.

## Reference:

- Altron, BKE, Conteg, ethernut.de, HWgroup, SecuriLas, SQS Fiber, T-Mobile, Zypcom Inc.
- Software developed by our company runs in several Allen-Bradley products. Stratix 6000 devices won a competition, where also Cisco and Hirschmann participated. We were able to offer a unique DHCP by port feature and tied integration into RS Logix 5000 environment.
