

Embedded Technologies \ Metrology:

Solar Monitor

Precise supervision for your photovoltaic plant

Solar Monitor

- is an innovative solar plant monitoring solution
- is developed exactly for Czech market needs it supports automatic issuing of invoices and energy statements to maximally simplify the tricky grant regulations
- displays current production data and **continuously protects your plant** against theft or unexpected outage
- promptly informs you about problems thereby prevents yield loss
- is operated via **well-arranged web interface** you need only a web browser to have a control over your photovoltaic plant
- **natively supports czech language** and applies context help to keep you on the right way

Key Features:

- Integrated Invoicing: Do not loose your time with paperwork!
- **Production Summary:** Current data always available
- Event Notification: Be promptly informed about status change and other events
- Theft Protection:
 Don't tremble for your investment

- Lightning Arrester: You know when a problem occured
- Panel and Ambient Temperature: Temperatures, solar radiation intensity and energy output are shown in interactive graphs
- Continuous Inverter Monitoring: Inverter is a most important part of your plant hence is monitored 24h / day

Web Interface:

- Completely localized
- Well-arranged and intuitive
- Fast
- Cantains context help
- The user does not need to have energetic and accounting background
- Independent on computer platform and operating system - web browser is always available
- Easily customizable plant name

Production Overview:

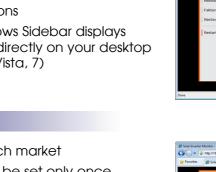

- Tidy graphs show production data •
- Peak values table (panel temp., ambient temp., solar radiation, inverter temp., grid frequency, grid voltage...)
- Saved CO₂ emissions
- Gadget for Windows Sidebar displays production data directly on your desktop (for Windows XP, Vista, 7)

Billing Features:

- Designed for Czech market
- Billing data has to be set only once
- Generates invoice for "green bonus" (state-aided price per kWh)
- Generates invoice for energy sold to your customer(s)
- Generates energy statement (for bureau of energy regulation)
- Supports both modes of production ("green bonus" or "forced buyout")

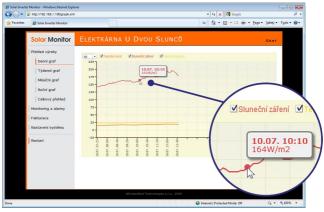

Technical Parameters:

- Dimensions: 86x33x90mm
- Power supply: 12V adaptor
- Optional DIN-rail or wall montage kits

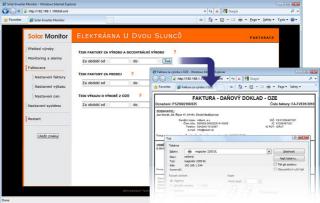

Intuitive interface in a web browser

Interactive graph

Billing: automatic invoice creation and print

Embedded Technologies s.r.o.

28. rijna 17, 511 01 Turnov, the Czech Republic | +420 481 313 661 | www.etech.cz | info@etech.cz

The company is focused on embedded systems development since 1996. Our know-how is in communication protocols, especially networking ones. We also develop management and configuration tools. We are able to advice most suitable real time operating system and effective development environment for your application. For further informations, please see www.etech.cz
